Profile

IT Infrastructure & System Support professional with 2+ years of experience managing Windows and Linux production environments in the healthcare sector. Skilled in infrastructure monitoring, incident troubleshooting, backup & recovery, network support, and operational stability. Experienced in supporting end-users, maintaining system uptime, and assisting infrastructure optimization to ensure reliable IT operations.

Education

Jan 2019 - Dec 2023	Bachelor of Science (B.Sc.) in Computer Science Universitas Dinamika Bangsa, Jambi GPA: 3.36
----------------------------	---

Employment

Jan 2024 - Present	IT Infrastructure & Support RSUD Bayung Lencir, Musi Banyuasin - Provided onsite IT support for 200+ hospital users across multiple operational departments - Managed and maintained operational IT infrastructure including desktops, laptops, printers, CCTV systems, access points, and networking equipment - Supported, monitored, and maintained 4 production servers including Proxmox virtualization infrastructure - Handled daily IT incidents and multiple operational support requests through internal support communication channels - Performed hardware, software, and network troubleshooting with minimal operational disruption - Maintained infrastructure stability through proactive monitoring and preventive maintenance
---------------------------	---

- Performed backup & restore operations to ensure system and database availability
- Monitored infrastructure performance using Grafana and Zabbix for early issue detection and operational visibility
- Supported LAN, TCP/IP, VPN, and Wi-Fi infrastructure connectivity for daily operational activities
- Assisted in minimizing downtime and maintaining stable day-to-day IT operations across production environments

Project Experience

- Supported system integration with BPJS and SATUSEHAT APIs for healthcare operational services
- Assisted Linux server deployment and Docker container implementation for internal operational systems
- Performed troubleshooting for API-related issues including timeout, connectivity, and rate limit problems
- Supported infrastructure monitoring and operational stability for production environments
- Assisted infrastructure optimization to improve system reliability and minimize operational downtime
- Performed system troubleshooting and incident analysis for operational service continuity

Languages

Indonesian	Fluent
English	Good

Skill

Infrastructure & Systems

- Windows Server
- Linux
- Proxmox VE
- Docker

Monitoring & Database

- Grafana
- Zabbix
- Pegaprox
- MySQL/MariaDB

Networking

- LAN/WAN
- TCP/IP
- VPN
- Basic Routing

IT Operations

- Backup & Restore
- Technical Documentation
- Asset Management
- Troubleshooting
